PARTNERSHIP WITH THE FOUNDATION OF PRINCE ALBERT II MONACO.

Conscious of the importance of education and awareness through the integration of environmental concepts in the various curricula, the Mohammed VI Foundation for Environmental Protection and Foundation Prince Albert II of Monaco will cooperate in the field of promoting good environmental practices by installing solar panels in Amr Mohamed El Asrir school, Asrir located in the Province of Guelmim, as well as the implementation of environmental programs.

Therefor, an agreement establishing the foundations for a strategic partnership between the Mohammed VI Foundation for Environmental Protection and the Prince Albert II of Monaco was signed in July 29, 2010.

Objectives

This partnership allows for the grant of the Foundation Prince Albert II of Monaco the completion of the pilot project on the "Establishment of an energy service level school in rural areas", raise awareness, on the one hand, young people in environmental issues affecting development of the country and future generations and promoting renewable energy. On the other hand, this cooperation will contribute to improving the quality of schooling for rural children and housing conditions and living teachers, principals and other school staff, by putting in place at these institutions, appropriate energy services through renewable energy.

It should be remembered that this project complements the actions initiated by the Mohammed VI Foundation for Environmental Protection, particularly through the launch of the Eco-schools "in rural areas."
